Course Objectives

- Explain the principles of local anesthesia and neurophysiology.
- Differentiate among anesthetic agents and vasoconstrictors, their uses, and contraindications. Demonstrate anatomical and clinical competence for anesthesia delivery.
- Perform safe and effective anesthesia techniques for maxillary and mandibular injections.
- Integrate patient assessment and risk management into anesthesia procedures.
- Apply infection control and safety procedures in armamentarium handling.
- Manage local and systemic complications related to anesthesia.
- Adapt anesthesia techniques for pediatric and medically compromised patients.
- Demonstrate professional and ethical patient communication and documentation. Meet TSBDE standards for dental hygienists administering local anesthesia.

TSBDE Compliance

This course meets Texas State Board of Dental Examiners (TSBDE) requirements for dental hygienists to administer local anesthesia.

Course offered through Palo Alto College Dental Hygiene Program

A pre-course didactic module must be completed before the in-person session.
